

Dracaena deremensis Janet Craig

Dracaena deremensis Janet Craig

Botanical Name:	Dracaena deremensis Janet Craig
Common Names:	Dragon Tree,
Native:	No
Foliage Type:	Evergreen
Plant Type:	Indoor Plants, Palms, Ferns & Tropical
Plant Habit:	Dense, Upright, Upright Narrow

Description:

A popular variety of house plant Dracaena with upright cane-like stems and clusters of deep, glossy green leaves.

Mature Height:	1-2m	Position:	Semi Shade, Shade
Mature Width:	30-60cm	Soil Type:	Any, Well Drained

Family Name: Asparagaceae

Origin: Africa

Characteristics:

Foliage Colours: Green

Flower Colours: Cream, White

Flower Fragrant: No

Flowering Season: All Year

Fruit: Yes

Requirements:

Growth Rate: Slow

Maintenance Level: Low

Water Usage: Low

Tolerances:

Drought: Medium / Moderate

Frost: Tender

Wind: Tender

Landscape Use(s): Feature, Foliage Feature / Colour, Indoor Plant, Shady Garden, Tropical Garden, Container / Pot

Pest & Diseases:

Mealy Bugs, Scale

Cultural Notes:

Grow in warm climate in a partly sunny spot with well-drained soil. In cooler climates it is perfect for pots which can be kept on patios, verandahs and indoors. Avoid overwatering. Commonly used as an indoor plant in offices, apartments and shopping malls. Fertilise and prune it back in spring or early summer if it is getting too tall. You can cut off the cane at any height and it will sprout a new cluster of leaves from where it was cut. It will rarely flower indoors and only flowers occasionally in its natural habitat. Propagate by either cuttings or seed.

Plant Care:

Annual slow release fertiliser
