

Scotts Lawn Builder Regular Lawn Food

Scotts Lawn Builder Regular Lawn Food

Botanical Name: Scotts Lawn Builder Regular Lawn Food
Common Names: TBA
Native: No
Foliage Type: Evergreen
Plant Type: TBA
Plant Habit: TBA

Description:

Mature Height: <15cm **Position:** TBA
Mature Width: <30cm **Soil Type:** TBA

Family Name: TBA

Origin: Africa

Characteristics:

Foliage Colours: TBA

Flower Colours: TBA

Flower Fragrant: No

Flowering Season: TBA

Fruit: TBA

Requirements:

Growth Rate: Slow

Maintenance Level: Low

Water Usage: TBA

Tolerances:

Drought: TBA

Frost: TBA

Wind: TBA

Landscape Use(s): TBA

Pest & Diseases:

TBA

Cultural Notes:

Apply Lawn Builder Regular in early spring, early summer and again in autumn.

No need to water in immediately. Check the forecast and apply before rain is expected.

Grass will green within one week of receiving moisture.

Calculate and measure out the amount needed to fertilise the lawn - 14g per square metre.

Use a [Scotts spreader](#) to spread the fertiliser evenly and to prevent spillage on paths or paving.

If allowed by local water authorities, water Lawn Builder in immediately. If not, simply apply it and wait for the next watering day or rainfall.

Plant Care:

TBA
