

Rhaphiolepis umbellata

Rhaphiolepis umbellata

Botanical Name:	Rhaphiolepis umbellata
Common Names:	Yedda Hawthorn, Raphiolepis,
Native:	No
Foliage Type:	Evergreen
Plant Type:	Hedging / Screening, Shrubs
Plant Habit:	Dense, Rounded, Shrub Like

Description:

A evergreen shrub with a compact and upright habit. It has stunning shiny dark leathery green leaves and beautiful fragrant white flowers in summer. Grows in full sun to part shade but produces more flowers when planted in full sun. A fantastic addition to the landscape making a great formal or informal hedge as well as a stand alone specimen. Has been noted as an environmental weed in some areas so check before selecting.
