

Correa glabra Ivory Lantern

Correa glabra Ivory Lantern

Botanical Name:	Correa glabra Ivory Lantern
Common Names:	Rock Correa,
Native:	Yes
Foliage Type:	Evergreen
Plant Type:	Shrubs
Plant Habit:	Rounded

Description:

A compact form of Correa glabra with dark green foliage and tubular cream flowers occurring in late Autumn to Winter. Ivory Lantern has a neat compact habit suitable for borders or a low hedge. This hardy form will flower if planted under established trees in dappled shade, and withstands extended periods of dry.

Mature Height:	30-60cm	Position:	Full Sun, Semi Shade
Mature Width:	30-60cm	Soil Type:	Well Drained

Family Name: Rutaceae

Origin: Australia

Characteristics:

Foliage Colours: Green

Flower Colours: Cream

Flower Fragrant: No

Flowering Season: Autumn

Fruit: No

Requirements:

Growth Rate: Moderate

Maintenance Level: Low

Water Usage: Low

Tolerances:

Drought: High

Frost: High

Wind: High

Landscape Use(s): Bird Attracting, Borders / Shrubbery, Courtyard, Formal Garden, Low Water Garden, Mass Planting, Shady Garden, Under Trees

Pest & Diseases:

Sooty Mould

Cultural Notes:

To ensure the best performance, choose well drained soils in full sun to part shade. Initially, water during extended periods of dry until established but do not over water! Fertilise annually with a low phosphorus slow release fertiliser and mulch well to retain moisture.

Plant Care:

Low phosphorus slow release fertiliser
