Cultural Notes:

Will tolerate periods of dry soil however regular watering and even moisture levels will result in stronger more vigorous plants. Mulching is important to protect surface roots from extremes of temperature and helps to retain soil moisture. Mulch should be applied over the soil to 10cm deep. Keep mulch 5cm-10cm away from the base of the plant so as not to impede airflow which may lead to an increase in pest and disease problems. Lightly prune after flowering to maintain shape. Extra trimming maybe required if a more formal hedge or shape is desired. Space plants 1m apart for a hedge or screen Images and information courtesy of Paradise Plants.
