### Description:

Hyacinths are one of the worlds most popular and beautiful flowering plants. They are perennial bulbs that flower in the Spring adding colour, fragrance and beauty to the garden. They come in a huge range of varieties with different colours. Ideally suited to cooler temperate regions. They can be purchased as either a potted specimen or as loose bulbs. They look effective when planted in containers, as bedding plants, under deciduous trees and if room permits when planted on mass. 'Aiolos' has a pure white flower.
